Education

Mapúa Malayan Colleges Laguna | Cabuyao, Laguna **Expected Graduation:** October 2026
Bachelor of Science in Computer Science, Specialization in Machine Learning
Relevant Coursework: Software Engineering, Database Management System, Data Analysis, Machine Learning

- Consistent recognition on the Dean's List and President's List during these academic years.

Liceo de San Pedro | San Pedro, Laguna
High School & Senior High School Graduate (STEM Strand) 2016 – 2022

- Graduated with High Honors
- Consistent acknowledgment of Honor students throughout the academic years.

Affiliation

Junior Philippine Computer Society **Treasurer | 2023 – 2024**

- Managed financial records and organizational funds for technical workshops and student events.
- Collaborated with the executive board to organize seminars and networking opportunities for computer science students.
- Audit internal transactions, ensuring transparency and accountability within the organization.

Association for Computing Machinery **Mapúa MCL Member | 2024 – 2025**

- Engaged in a global community of computing professionals, participating in technical discussions and collaborative learning environments.
- Attended specialized seminars and hackathons focused on advancing skills in machine learning and software development.

Projects

Palayon: Machine Learning for Sustainable Rice Post-Harvest Planning 2025
Developed for Sta. Cruz smallholder farmers to quantify rice disease likelihood and improve post-harvest planning.

- A mobile application utilizing CNN-based machine learning and image processing to provide real-time rice disease diagnosis and localized post-harvest management plans.

LoanPredictor: Intelligent Loan Approval System 2025
Designed for the financial services sector to automate customer screening eligibility for loan approval.

- An intelligent screening system that analyzes customer financial profiles to automate loan eligibility, reducing manual review time and improving the accuracy of credit decisions.

HazSpot: Geospatial Data Analytics & Time-Series Calamity Prediction 2025 – 2026
Developed for the Cabuyao CDRRMO to model calamity risk likelihood and environmental indices.

- A localized analytics platform that integrates multi-source geospatial data to quantify environmental indices and model calamity risk likelihood for proactive community-based disaster preparedness.

Technical Skills

Programming Languages: Python, C#, C++, JavaScript, HTML, CSS
Database: Supabase, SQL, MySQL, PHP
Machine Learning: TensorFlow, Scikit-learn, Keras, OpenCV, NumPy
Data Analytics: Microsoft Excel, Jupyter Notebook, Seaborn, Matplotlib
Collaboration & Tools: GitHub, Google Colab, Trello, Lucidchart

Certifications

- IBM Machine Learning Certificate 
- Google Data Analytics Certificate 

Soft Skills

- Adaptive learner with a strong foundation in machine learning.
- Strong analytical and problem-solving skills.
- Collaborative team contributor with strong interpersonal skills.
- Effective communicator in competitive team environments.
